PROFESSIONAL SUMMARY

Front-end Engineer specializing in React, Next.js, and TypeScript, with expertise in interactive UI architecture using Three.js, React Three Fiber, and GSAP. Backed by a quantitative foundation in finance, I build high-performance e-commerce storefronts, scalable data dashboards, and 3D web experiences optimized for smooth rendering and sub-second response times.

TECHNICAL SKILLS

Frameworks & Languages: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3.

Interactive & 3D Web: Three.js, React Three Fiber (R3F), GSAP (ScrollTrigger), WebGL, Canvas API.

Core Engineering: Responsive Architecture, State Management, API Integration, Component Systems.

Tools & Workflow: Git, GitHub, Vercel, Figma, VS Code, Supabase, Firebase.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer

Remote

Early 2026 – Present

- **3D Artist Portfolio Platform (Client Project):** Engineered an interactive showcase using React Three Fiber, Three.js, and GSAP for a 3D product and automotive artist, deploying a high-performance 3D canvas pipeline.
- Optimized WebGL model loading and shader delivery, maintaining 60 FPS viewport interactions across desktop and mobile browsers without UI frame drops.
- **Open-Source Contributor (“LinkVeil”):** Refactored component hierarchies and navigation layouts for an open-source privacy management tool, resolving routing flickers and enforcing uniform design tokens.

TECHNICAL PROJECTS

PAYLESS E-Commerce & Admin Dashboard | *Next.js, React, Tailwind CSS, Context API* [GitHub](#) | [Live](#)

- Engineered a responsive multi-page e-commerce storefront tailored for wholesale food distribution using Next.js Page Router.
- Implemented global state management via React Context to power cart persistence and automated WhatsApp order routing.
- Developed a secure administrative dashboard featuring simulated authentication, inventory threshold alerts, and lead status tracking.

veriScale Dashboard | *Next.js / React, TypeScript, Tailwind CSS*

[GitHub](#) | [Live](#)

- Architected a responsive administrative and analytics dashboard featuring dynamic layout grids and modular data views.
- Implemented robust client-side state handling and component-level data binding for real-time metric tracking and dynamic filtering.
- Designed a high-contrast, accessible UI system with zero layout shifts, successfully hosted and deployed on Vercel.

Microclimate | *React, TanStack Query, Tailwind CSS, REST API*

[GitHub](#) | [Live](#)

- Developed a real-time environmental data visualization application consuming OpenWeatherMap API endpoints.
- Architected clean data presentation layers using TanStack Query for background synchronization, intelligent caching, and resilient UI states.

EDUCATION

BSc Finance

Expected 2026

Kwara State University (KWASU), Malete

- **Core Focus:** Financial Modeling, Cooperative Financing, Micro-economics, Quantitative Analysis.
- **Current Research:** Analyzing the effects of cooperative financing on living standards in the Ilorin metropolis, translating complex economic datasets into actionable empirical findings.
